

Waytronx, Inc. Fact Sheet

COMPANY	Waytronx, Inc.
STOCK TICKER	OTC BB:WYNX
HEADQUARTERS	Tualatin, Oregon
OFFICERS	<ul style="list-style-type: none">• William Clough, Chief Executive Officer and Director• Matthew McKenzie, Chief Operating Officer and Director• Daniel Ford, Chief Financial Officer• Colton Melby, Chairman• Corey Lambrecht, Director• Sean Rooney, Director• Tom Price, Director
MARKET	Waytronx delivers openly licensable thermal management solutions.
OPPORTUNITY	Waytronx's WayCool™ & WayFast™ technologies offer a patented architectural approach to the intense heat generated by today's advanced electronic systems, known as "microwarming." In addition to cooling, WayFast allows for communication and current [thus 3C for 3D] to be provided through the same mesh system. Microwarming, a new industry phenomenon, causes increased system bottlenecks, decreased system performance and overheating at the chip level and is proving to be the gating factor in the next generation of computing. WayCool technology solutions are focused on markets including semiconductor, solar, medical, display and electronic packaging. According to a study by Principia Partners, just one portion of the PC market could amount to more than \$5.4 billion.
TECHNOLOGIES	Waytronx WayCool™ & WayFast™ technologies' open architecture and highly scalable openly configurable elements include: <ul style="list-style-type: none">• Carbon block for up to 4X the heat transfer capability of the most commonly used copper plates• Communication and power capabilities unavailable in any other thermal management solution• Tensile mesh for increased flexibility, performance and reliability Hybrid combinations of these elements are available in Industry Reference Designs optimized for specific target markets are available.
